

#SCIENCEFTW: PTEROSAURS AND SCIENCE EXPLORERS

Collaborate with game designers and Museum staff to build two new games about pterosaurs and science explorers

This program is for high school students

20 sessions, M/W, October 28, 2013 - January 22, 2014, 4:30-6:30pm

THIS IS A NO FEE PROGRAM.

In #scienceFTW (that is, Science For The Win!) you will play games (about such science topics as paleontology, astronomy, and more) with both Museum experts and game designers.

Then you will learn how to design your own games.

Working with your peers and professionals, together we will collaborate on the development of prototypes for two new Trading Card Games (think *Pokemon* or *Magic: The Gathering*) for the American Museum of Natural History.

The first will focus on pterosaurs, drawing upon materials being developed for our Spring, 2014 show, and the second on the work of scientists advancing knowledge and understanding in a museum context.
